DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 10 December 2010 amends claims 1 and 22. Claims 45-51, 56, and 62 are cancelled. Claims 63-66 are added.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Todd A. Rathe (Reg. No. 38,276) on 14 December 2010.

The application has been amended as follows:

For claim 1: delete "wherein the authorization granting interface is configured to remain coupled to unused portions of the consumable resource upon withdrawal of the unused portions of the consumable resource from the image forming device" from lines 14-17.

For claim 66: add at the end of the last line, "wherein the authorization granting interface is configured to remain coupled to unused portions of the consumable resource upon withdrawal of the unused portions of the consumable resource from the image forming device."

Allowable Subject Matter

3. Claims 1-34, 37-38, 41-44, 54-55, 57-61, 63-66 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose or make obvious the claimed consumable resource authorization wherein a prospective

Art Unit: 2432

user is authorized to use the consumable resource based on an authorization input and interaction with an authorization granting interface that is coupled to the consumable resource and remains coupled to unused portions of the consumable resource upon withdrawal of the unused portions from the image forming device. The authorization granting interface is configured to grant a first authorization level in which use of the resource by a first user is denied, a second authorization level in which a second user is granted a first extent of rights to use the resource and a third authorization level in which a third user is granted a second extent of rights, different then the first extent of rights, to use the resource.

Additionally, the prior art does not disclose or make obvious the claimed consumable resource authorization wherein a prospective user is authorized to use the consumable resource, wherein the consumable resource is a print medium, based on an authorization granting interface that is coupled to the consumable resource and remains coupled to unused portions of the consumable resource upon withdrawal of the unused portions of the consumable resource from the image forming device.

Finally, the prior art does not disclose or make obvious the claimed consumable resource authorization wherein a prospective user is authorized to use the consumable resource, which is included in a chamber having code configured to be read by an optical scanning device, based on an authorization granting interface that is coupled to the consumable resource and remains coupled to unused portions of the consumable resource upon withdrawal of the unused portions of the consumable resource from the image forming device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
